PROFESSIONAL SUMMARY

Seeking for an opportunity to apply my analytical and technical skills to solve real-world business problems. My objective is to gain hands-on experience in the field of data science while continuously learning and improving my skills. I am looking for a challenging role in a dynamic organization where I can contribute my knowledge and creativity to drive innovation and make a meaningful impact.

TECHNICAL SKILLS

Programming languages:

Python, Bash

Data Visualization Tools:

Power BI, Tableau

Data Management Tools:

MySQL

Operating Systems:

Linux (Debian Based), Window 10

CERTIFICATIONS

- Crash Course on Python | Google Inc | Dec '21 | Python
- Energy Within Environmental Constraints| Harvard University | Aug '21
- Data, Data Everywhere | Google Inc | Jan' 22 | Data-science domain

POWER SKILLS

- Initiates conversation with others.
- Values imagination
- Empathetic towards others.
- Works independently in a structured manner.

EXTRA CURRICULAR ACTIVITIES

- Headed the Graohics designing team in LPUs highest tier group.
- AI-ML Team member of GDSC-LPU.

PROJECTS

Image Classifier Model

Apr'23

- Domain: Neural Network | Programming Languages: Python |
 - Constructed a neural network to classify images as cat or non-cat.
 - This neural network was created using Logistic Regression without using any such famous python modules like sci-kit Learn or TensorFlow.
 - Used various mathematical techniques such as sigmoid function and learning rates.

Machine Learning model on Heart Disease Prediction

Feb'23

- Domain: Machine Learning | Programming Languages: Python |
 - Built a machine learning model using sci-kit learn and TensorFlow to predict the chance of a human being have heart disease from their blood test report.
 - Hyper-parameter tuning to make the model give more accurate prediction.

Exploratory Data Analysis on Global Terrorism Dataset

Nov'22

- Domain: Data Analysis | Programming Languages: Python |
 - Performed Data Analysis to understand the underlying reasons of why a country is being attacked more compared to others
 - Performed data cleansing and data manipulation on the dataset.
 - Found some insights on the hot zones of terrorism.

Discussion Form (CLI)

Apr'21

- Domain: OOPs | Programming Languages: Java |
 - Debugged a Discussion Form
 - Using the concepts of OOPs to call various functions.
 - Created UserRoles(), GetRole() to assign the hierarchy of access in the system.

Volume Controlled by Hand Gestures

Dec'20

- Domain: Computer Vison | Programming Languages: Python |
 - Built a module using OpenCV to control a device's volume using hand gestures.
 - Used the NumPy and mediapipe to connect the image feed with the volume function.

ACHIEVEMENTS

Amazon Summer ML School

Jun '22 - Jul '22

Selected among top 500 students pan-India to get one to one learning from India's topmost Data Scientist in Amazon.

Ranked 2nd all-over university in essay writing competition

Feb '21 - Apr '21

EDUCATION

B.Tech. in Computer Science

Apr '20 - Present

Lovely Professional University | Phagwara, IN

CGPA 7.96
